

Water memory leads to science of new paradigm beyond materialism

Won H. Kim

*Department of Biochemistry Yonsei University Wonju College of Medicine,
Wonju, Kangwondo, Korea*

Science of 21st century needs new paradigm beyond materialism. New paradigm will be initiated from the unexplainable fact. Quantum science came from the trial to explain the unexplainable fact, black body radiation. This time it could be water memory which is not explained with current science based on materialism.

New paradigm explains water memory with 3D wave inherent to matter. 3D wave is faster than the speed of light and exists in the area of imaginary number. 3D wave can be separated from the matter to water. 3D wave of hormone in water as separate entity can be interacting with hormone, leading to cellular transmission. 3D wave of medically effective substances can be stored in water and can be utilized successfully for treating various diseases.

3D wave can be digitized and expressed in 2D space. Digitized 3D wave shows the same functionality of the original matter through holographic space. Digitized 3D wave can be modulated to electricity and change the characteristic of electricity.

There are enough facts which require new paradigm out of materialism. 21st century should be an era for new paradigm beyond materialism.
